Programme Educational Objectives (PEOs) of M. Tech. (CSPE)

The objectives of the M. Tech in Communication and Signal Processing Engineering (CSPE) programme of National Institute of Technology Silchar are:

PEO-1: To impart fundamental concepts, enhance the foundation and analytical skills of students in Communication and Signal Processing and make them capable to analyze, formulate and solve problems in the allied field of studies.

PEO-2: To impart the recent trends & developments in communication and signal processing, familiarization with latest design trends and modelling, and to motivate them to address real life challenges with viable innovative solutions.

PEO-3: To impart research skills with the aid of modern tools, formulate innovative ideas through independent thinking and Reflective Learning and to prepare them for conducting high value research & develop an attitude for lifelong learning process in the field of communication, signal processing and other related areas.

PEO-4: To preserve the highest values of professionalism and ethical attitude and provide an academic environment that gives adequate opportunity to the students to cultivate lifelong skills.
