REMOTE ACCESS

The screenshot shows the website's header with the logo and navigation menu. The main content area has a breadcrumb trail 'Home / Remote Access' and two highlighted buttons: 'Browser Setup' and 'Resource(s)'. A yellow callout box with an arrow points to the 'Manual Setting' section, containing a list of steps for configuring Firefox. A search bar and 'Advanced' link are visible in the top right.

Home / Remote Access

Browser Setup Resource(s)

Step by step instructions to setup remote access

To access the resources subscribed by your library outside your campus network, please configure the browser settings first.

These browser settings route all the full text requests from Knimbus to publisher through a proxy server set up for your organization. The process of configuring your browser is given below:

Firefox Chrome Internet Explorer Safari iPhone/iPad Android

Manual Setting

1. Click on the Firefox menu tab and then click options OR from Firefox menu bar: **Tools > Options**
2. Click the advanced icon and then click on the **network tab**.
3. In the **connection area**, click **settings** to bring up the connection settings window.
4. Select **automatic proxy configuration URL**. Copy and paste the following given URL in the box below. (This URL must be copied exactly with no spaces).
http://nitcc.new.knimbus.com/ws/raPacFile?userId=mrinalini.aggarwal_knimbus.com
5. **Click OK**, then close all configuration windows.
6. **Save and restart** the browser.

Note: in Linux (Ubuntu) Firefox options is called preferences and is located in the edit menu.

The below table reflects the difference between old and new version of Knimbus.

-  Active feature
  Feature under maintenance.
  Feature not available.
  Upgraded feature
  Feature dropped.

S.NO	Title	Product Features	Old Version	New Version	Remarks
